

Certificate of Achievement

Muhammad Hamza

has completed the following course:

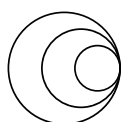

TRAIN THE TRAINER: DESIGN GENOMICS AND BIOINFORMATICS TRAINING WELLCOME CONNECTING SCIENCE

This course covered adult learning and teaching principles and the role of the teacher in a learner-centred environment. It demonstrated the iterative process of learning design applied to genomics training, and offered an opportunity for trainees to design their own courses.

3 weeks, 5 hours per week

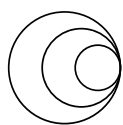

Dr Alice Matimba
Head of Learning Design and Delivery
Wellcome Connecting Science

The person named on this certificate has completed the activities in the attached transcript. For more information about Certificates of Achievement and the effort required to become eligible, visit futurelearn.com/proof-of-learning/certificate-of-achievement.

This certificate represents proof of learning. It is not a formal qualification, degree, or part of a degree.

Muhammad Hamza

has completed the following course:

TRAIN THE TRAINER: DESIGN GENOMICS AND BIOINFORMATICS TRAINING WELLCOME CONNECTING SCIENCE

100%
OVERALL
SCORE

This course covered adult, active learning and teaching principles and the role of the teacher in a learner-centred environment. It covered good practice learning and teaching skills including communication, group work and facilitation. It demonstrated the iterative process of learning design and development applied to genomics and bioinformatics training, with examples of best practices. It offered an opportunity for trainees to design, and reflect on their own courses using peer review.

STUDY REQUIREMENT

3 weeks, 5 hours per week

LEARNING OUTCOMES

- Discuss adult learning theory and illustrate how an active, learner-centred approach guides course design.
- Apply good practice learning and teaching skills, including communication, group work and facilitation skills.
- Identify opportunities to create learning experiences from subject content.
- Plan and design learning for a selected audience encompassing aspects of generation and analysis of genomic data, suitable for own context and environment.
- Evaluate and reflect on learning design and identify areas for improvement using peer review feedback.

SYLLABUS

- Adult learning and teaching principles and approaches for small or large groups.
- Social learning through knowledge sharing; the role of the teacher/trainer in a learner-centred environment.

- Iterative process of learning design and development applied to genomics training.
- Common educational methods to teach and assess bioinformatics and laboratory methods required for genomics.
- Peer review project: designing genomics training, followed by evaluation, reflection and improvement.
